Summary

I am a motivated software developer with a Bachelor's degree in Mechanical Engineering and a solid foundation in Java and web technologies. I possess strong skills in Core Java and Full Stack Development, having created several projects, including a Student Management System and a portfolio website. I am eager to apply my knowledge and creativity in a professional setting while pursuing growth in the IT industry

Projects

Kanban Board

Developed a responsive task management tool using React.JS, Express and MySQL with drag-and-drop functionality. Features include:

- Intuitive UI with dynamic card creation, priority tagging, and progress tracking.
- Backend integration with Node.js/Express (or your framework) and MongoDB/Firebase (your DB).
- Code hosted on GitHub (Link)

Student Management System

Developed a full-stack web application to automate student data management. Key features:

- This project is developed using React, Sprin boot and MySQL.
- CRUD operations for student records with form validation and dynamic UI updates.
- RESTful API integration (Spring Boot backend).Database design with MySQL and Hibernate ORM for optimized data transactions.
- Responsive dashboard with search functionality and pagination (React.js).
- Code hosted on GitHub (Link)

Amazon Landing Page Clone

Made front-end clone of amazon's interface.

- The main purpose of making this clone is to learn HTML and CSS.
- Used Swiper.JS for the infinite sliding window.
- Deployed this project on netlify. (Link)

Fanta Landing Page

Designed and developed an interactive, visually engaging landing page replicating Fanta's branding. Key features:

- HTML, CSS, JavaScript used to make this project.
- Dynamic animations (hover effects, scroll-triggered transitions) and a vibrant UI mirroring Fanta's color scheme.
- Used Gsap scroll animation for beautiful scrolling animation.
- Deployed this project on netlify. (Link)
